IT MEANS "IN PLACE", I.E., MINIMUM EXCAVATION---PROBABLY ONLY ENOUGH TO REMOVE THE EXISTING TANKS AND THEN FILLING AND INJECTING REMEDIATION MEDIA INTO THE SURROUNDING AREA AND LETTING THE BUGS DO THEIR THING.

I CONTACTED SUE KENT @ DAMES & MOORE THIS MORNING TO GET AN UPDATE ON THE CORE SAMPLE ANALYSES FROM LAST WEEK'S DRILLING. THE ACTUAL ANALYSIS WILL BE AVAILABLE NEXT WEEK BUT THE PRELIMINARY INDICATIONS ARE GOOD. THERE WAS NO FREE PRODUCT FLOATING IN THE GROUND WATER SAMPLES; THERE WAS NOT APPARENT GROSS HYDROCARBON CONTAMINATION OF THE SOILS CORED. THIS MEANS THAT REMEDIATION WILL BE A LOT LESS EXPENSIVE THAN WE HAVE BEEN ANTICIPATING AND PROBABLY CAN BE DONE IN SITU. WILL KEEP YOU UPDATED.

I'M JUST AN OLD BARGE BIMBO---WHAT DOES 'IN SITU' MEAN?

I TALKED WITH SUE KENT (DAMES & MOORE) THIS AFTERNOON AND THE CORE DRILLING IS SET UP FOR THE WEEKEND OF 10/20-21 UNLESS GEORGE PAVES THE WAY TO DO IT ON 10/22-23 RATHER THAN THE WEEKEND. ANALYSES SHOULD BE AVAILABLE SHORTLY THEREAFTER.

DAMES & MOORE WILL BE CONDUCTING CORE DRILLING AT THE DOCK TANK LOCATION AS SOON AS IT CAN BE COORDINATED WITH AML, SHOULD KNOW A DEFINITE TIME THIS WEEK. I WILL MAKE A RECOMMENDATION FOR A REMEDIATION PROCESS BASED UPON THE RESULTS OF THE CORE DRILLING. BILL TROY & I MET WITH DAMES & MOORE SOME TIME BACK AND A DECISION WAS MADE AT THAT TIME TO CONDUCT CORE DRILLING BECAUSE THE VAPOR SURVEY RESULTS INDICATED A SIGNIFICANT AMOUNT OF CONTAMINATION BUT IS NOT ABLE TO DEFINE ACTUAL LEVELS. ACTUAL HYDROCARBON LEVELS WILL HAVE AN IMPACT ON WHICH REMEDIATION PROCESS IS MOST EFFECTIVE NOT ONLY IN ADDRESSING THE CONTAMINATION BUT EFFECTIVE FROM A COST STANDPOINT, TOO.

IN A CONFERENCE CALL WITH DAVEH AND ED KRONICK YESTERDAY, I AGREED TO SIT DOWN WITH ED'S PEOPLE ONCE WE HAVE THE CORE DRILLING ANALYSES IN HAND AND TAKE A LOOK AT THEIR IN SITU REMEDIATION PROCESS.

VAPOR SURVEY RESULTS FROM THE CFS TANKS INDICATE THAT THERE IS NO DETECTABLE CONTAMINATION, THEREFORE THOSE TANKS CAN BE REMOVED AT ANY TIME ALTHOUGH IT WILL PROBABLY BE MOST COST EFFECTIVE TO DO THAT WHEN THE CONTRACTOR HAS EQUIPMENT IN THE AREA TO HANDLE THE DOCK TANKS.
